

We own a business jet

WE DON'T OWN A PRIVATE JET

When we fly our CJ1, we take a full cabin (nothing private about that) and we mean business. To maximize productivity, our daily flight missions include multiple meetings with several clients, often in different cities. Our business jet has access to over ten times more airports than the airlines do, so we can respond to client needs at the speed of business—and our employees can be home in time to enjoy dinner with their families.
